Practices:	Agile

EXPERIENCE

Willow November 2024 – January 2026

Software Developer

- Architected and developed an omnichannel platform using Next.js and Nest.js, integrating seamlessly with Mercado Libre, Tiendanube, and Shopify APIs.
- Led the definition of the technical and functional roadmap, optimizing the product development lifecycle and aligning engineering efforts with business goals.
- Provided continuous technical customer support, ensuring high resolution rates for complex integration issues.

Offerwise March 2024 – March 2025

FrontEnd Developer

- Developed high-performance Single Page Applications (SPAs) and integrated third-party services to enhance user experience.
- Collaborated in dynamic teamwork environments, managing technical communication with clients to translate requirements into functional web features.

Freelance November 2023 – Present

FullStack Developer

- Developed a real estate website using TypeScript and Next.js, increasing project visibility and improving potential client reach by 25%.
- Engineered a web scraper to automate agrochemical data collection, reducing manual processing time by several hours per week.
- Designed and deployed responsive landings and interactive prototypes for diverse client needs.

EDUCATION

Universidad Tecnológica Nacional 2026 – 2027

Associate Degree in Computer Systems (In Progress)

Soy Henry 2023 – 2023

Bootcamp FullStack Developer
